SUMMARY

PHARMACEUTICAL CARE IN POLISH ADMINISTRATION LAW

Important role of health care and as a part of it pharmaceutical care was seen by World Health Organisation many years ago. Because of it World Health Organisation established a Third Consultative WHO group, which in 1997y. set document "The role of the pharmacist in the health care system, Preparing the future pharmacist Curricular Development". This important role and its influences of society was seen by polish lawmaker. The legislator took account for the changes in society while creating amendment to the act in 2008y. Recasting of legislation and introduction to law direct pharmaceutical care regulations in 2008y. was important step for development of this institution in Poland. But still, after ten years of introduction there is significant lack of regulations in this materiality. Because of that it is important to seeking of understanding pharmaceutical care around law. International Pharmaceutical Federation, which is international pharmacist organisation stated a „Statement of policy on good pharmacy education practice” in 1998y. Hague. This document which is not officially a law regulation has big influence for pharmacy and pharmacist work. Also important role acts polish pharmaceutical federation.

It is important to appropriate description of pharmaceutical care law regulation,s. Understanding of disease managment, as is pharmaceutical care gives opportunities but also responsibilities. Its presents is important for function healthcare facilities
