	Fundamental knowledge of civil and commercial law
	Wiedzy, umiejętności i kompetencji społecznych dla przedmiotu/modułu:
Knowledge of civil, commercial and private law and acquired skills and competences in presenting legal problems and legal inferences	
13.	CELE PRZEDMIOTU
	The subject matter is the analysis of selected national company law institutions, which were transposed (by implementing directives) or directly introduced (by direct application of regulations) EU standards. This is reflected in the broad context of contract and competition law. Student, through analysis of basic theoretical and practical issues related to company law, has the knowledge enabling identification of sources of law and definition criteria for the distinction of the agreements in business (knowledge). The ability to practice the acquired knowledge is expressed in the assessment and comparison of individual companies (skills) and in the form of arguments and counter arguments for the choice of particular forms of activity (competences).
